led by science - defined by nature

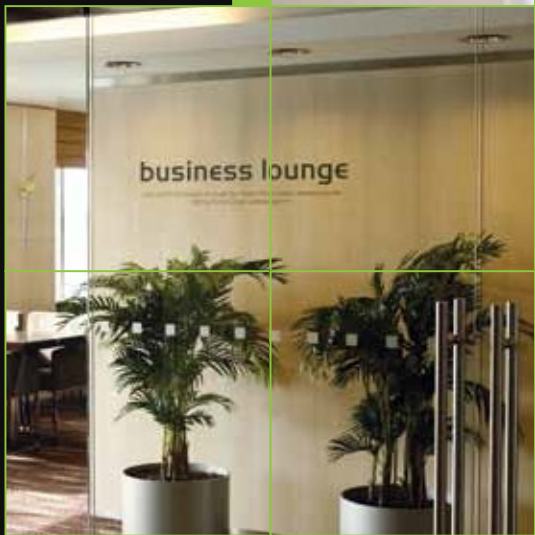

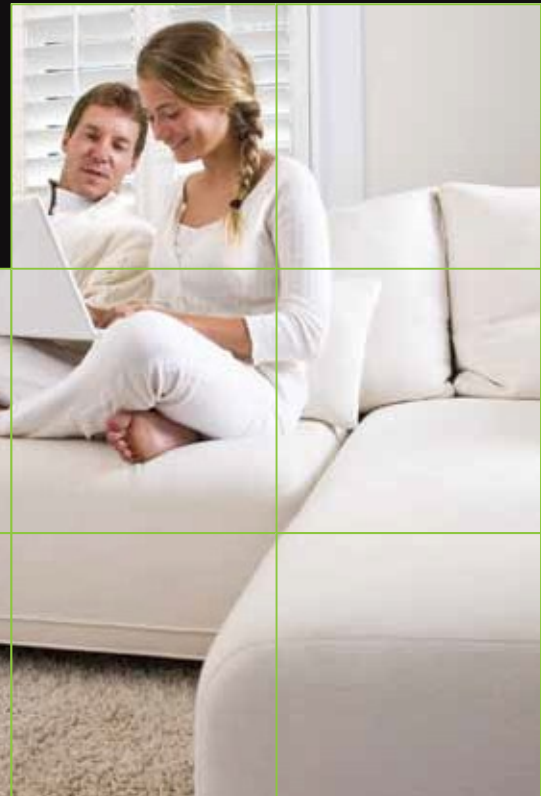

## ■ led by science - defined by nature

The **ENVIRODRI** Dry Carpet Cleaning system offers an unrivalled method of cleaning carpeting without the need to add water. The system was developed to eliminate many of the compromises associated with wet cleaning methods. There is no down time - carpets can be walked on DURING and IMMEDIATELY AFTER cleaning.

At the heart of the System are the **ENVIRODRI** 'Microsponges' - tiny organic, sponge-like particles which contain just the right amount of natural detergent and wetting agent, to dissolve and absorb both water and oil based dirt. The particles are brushed deep into the carpet pile using the **ENVIRODRI** Gen 4 Machine and then simply vacuumed away, leaving carpeting dry, clean and smelling fresh.

The **ENVIRODRI** product range is formulated from the highest quality ingredients placing prime importance on effectiveness, efficiency of performance and care of the environment.

The System is Simple to Use, requires Minimal Training and is versatile enough to meet all Carpet Cleaning Requirements

## ■ benefits of the **ENVIRODRI** system

- Suitable for all types of carpeting from Synthetics to Natural
- Carpets can be walked on during and immediately after cleaning - No down time, DEEP CLEAN ANYTIME
